

Nuclear Materials Committee

Larry Powell, Chair

Larry Powell, Chair

This committee was established to study issues that involve nuclear materials (generally uranium and plutonium) that have an impact on present or future SRS activities. Issues include used nuclear fuel program activities (foreign and domestic), nuclear materials management and nuclear materials integration. The committee addresses the consolidation, storage and disposition issues related to the legacy materials that were once part of the nuclear weapons production cycle that are no longer needed for their original purpose, but are not considered waste. The NM Committee also looks at the receipt and storage of foreign research reactor spent nuclear fuel. Topics under consideration for the Nuclear Materials Committee in 2017 include:

- Atoms for Peace Overview
- Spent Nuclear Fuel Program Overview/Update
- Plutonium Program Overview/Update
- Federal Repository Status
- 235-F Deactivation
- Administration Priorities (State & Federal)
- Update on any Strategic NM Plans
