

**Savannah River
National Laboratory™**

OPERATED BY SAVANNAH RIVER NUCLEAR SOLUTIONS

We put science to work.™

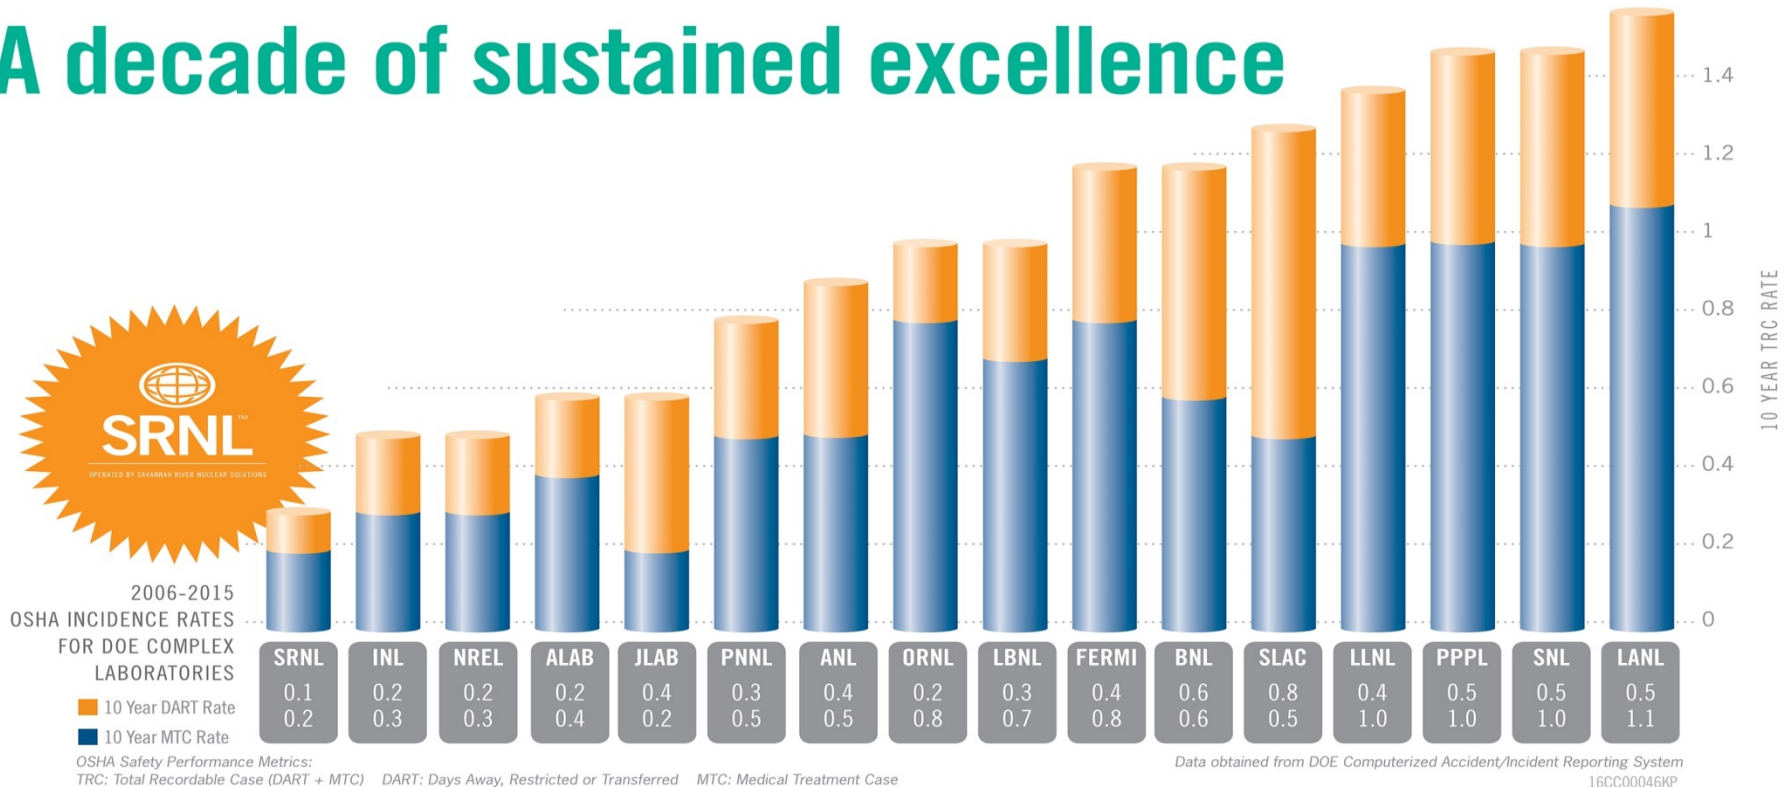

Savannah River National Laboratory

Dr. Terry Michalske
Director, Savannah River National Laboratory

*Citizens Advisory Board
September 27, 2016*

Savannah River National Laboratory Uncompromised Focus on Worker Safety

A decade of sustained excellence

Focus on National Challenges

Clear Guidance for a New Direction

"SRNL is a laboratory that I rely on very heavily.... We cannot stop innovating. We have decades to go and many opportunities."

Dr. Ernest Moniz,
U.S. Secretary of Energy

"EM has lost the process engineering capability it once had. SRNL must play a key role in helping EM reestablish this capability. SRNL has to be recognized as the go-to place for process engineering answers across DOE, other government and commercial sectors."

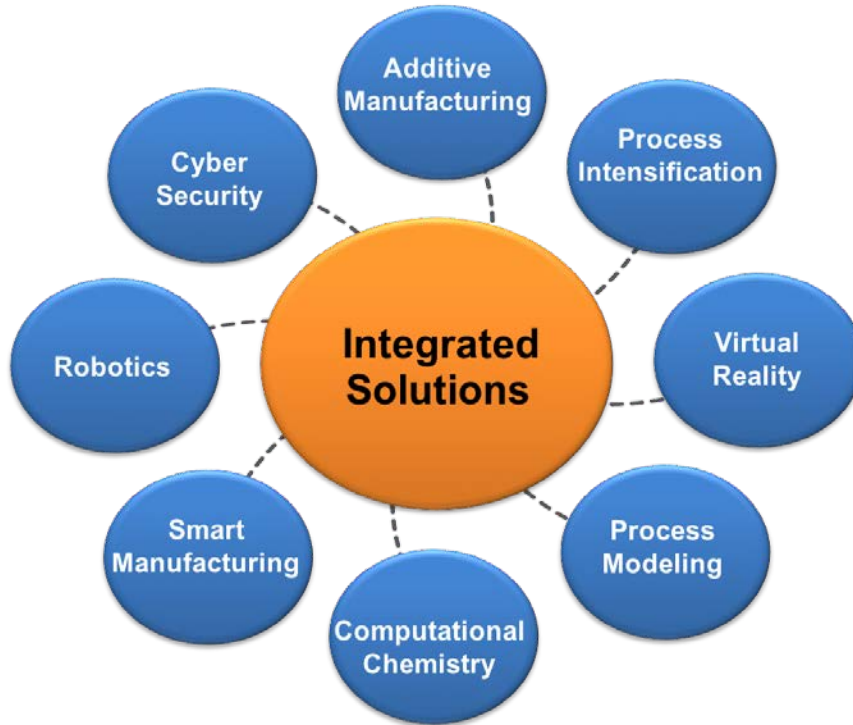

Dr. Monica Regalbuto,

New Manufacturing Technologies Bring Better Solutions

Bridging the gap between
Technology &

Implementation

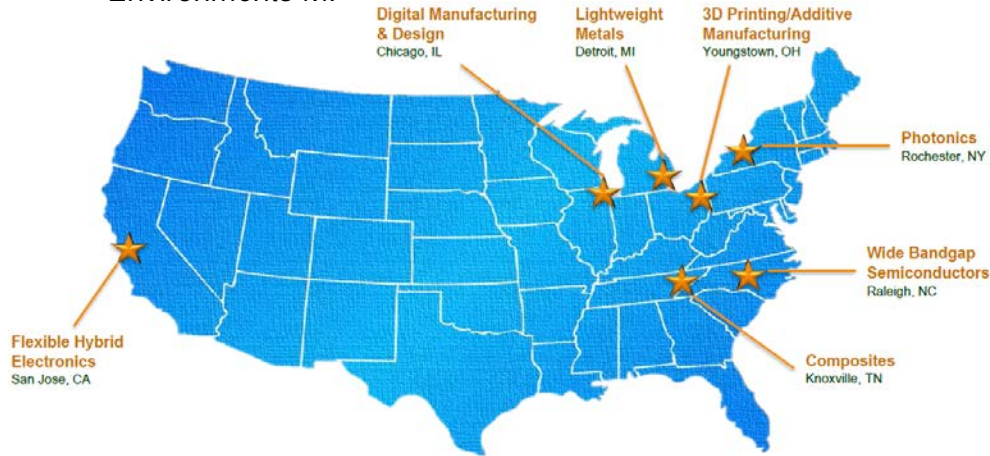

Partnerships in Advanced Manufacturing

Managing risk drives

Modern Manufacturing

Carnegie Mellon

Robotics In Manufacturing
Environments MI

National Manufacturing Institutes

- Improve worker safety
- Reduce capital and operating cost
- Private sector innovation for game-changing solutions

Pivot Toward Sustained Site Future

Short-term goals to reach a
long-term

Vision

Advanced Manufacturing technologies address today's cleanup needs.

The **Advanced Manufacturing Collaborative** will pivot the Savannah River Site for a future beyond legacy waste – combining manufacturing and science to reduce risk.

SRNL Strategic Initiatives

SRNL is the **Future**
of **SRS**

- Technical Leadership for EM Cleanup Mission
- Tritium Expertise for Nuclear Deterrent
- Manufacturing Innovation for DOE/NNSA
- Manufacturing Solutions for the Nation in Partnership with Academia and Industry
- Nuclear Assessments and Forensics Improvement
