**ENERGY**

# SRS Transition Implementation Briefing to CAB

**Edwin Deshong**

**Deputy Manager, Savannah River Operations Office**

**September 2024**

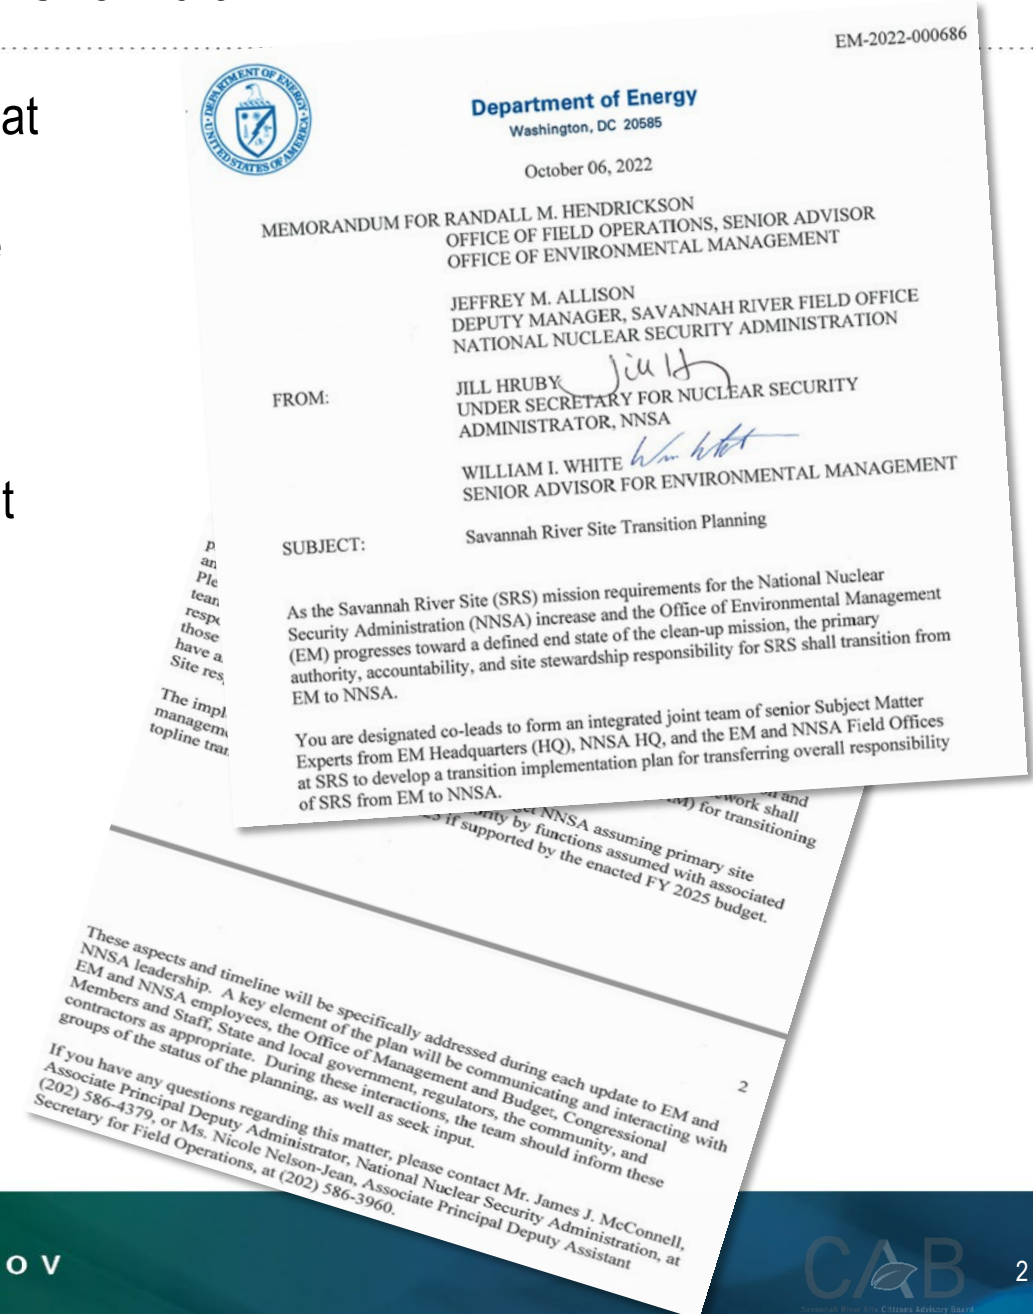

# Savannah River Site Transition Planning Memorandum

As DOE-Environmental Management (EM) completes its cleanup work at SRS toward a defined end-state of 2065, the National Nuclear Security Administration's (NNSA) nuclear security mission continues to increase onsite.

As a result, EM is transferring stewardship responsibilities to NNSA

A working Transition Plan addresses the direction and represents a joint agreement between EM and NNSA to accomplish a seamless SRS transition with fairness and continuity for ongoing programs.

- Letter issued October 6, 2022, from EM-1 and NA-1
- Transfers overall responsibility of SRS from EM to NNSA by FY25 (October 1, 2024)

# SRS Transition Plan

## Transfers Four (4) Major Responsibilities from EM to NNSA:

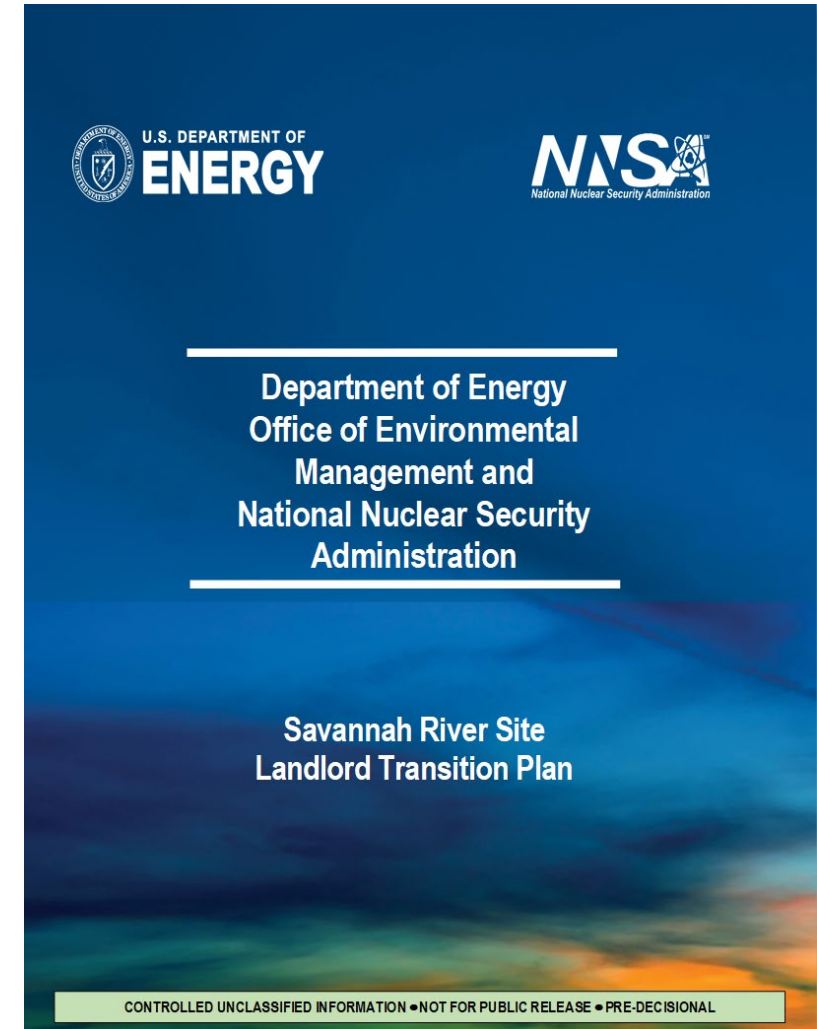

**M&O  
Contract**

**Pro-Force  
Contract**

**K-Area  
Complex**

**Env. Permits &  
Agreements**

- Accounts for responsibility and management of functions transferring from EM to NNSA
- Provides an integrated detailed Plan of Actions and Milestones
- Supports NNSA assumption of primary Site management responsibility & budget authority by functions in Fiscal Year 2025
- EM will remain focused on completing important remaining legacy cleanup activities at SRS.

# Workforce Restructuring Guiding Principles for Transition

## RETENTION

All incumbent employees will be retained

## STAFFING PLAN

Staffing plans from both EM & NNSA are based on the agreed upon transferring functions

## VACANCIES

EM vacant positions associated with function/scope transfers will be moved to NNSA

## NO INCREASE IN FTEs

Strategic Workforce planning for an enduring and growing mission

## JOB FAIR

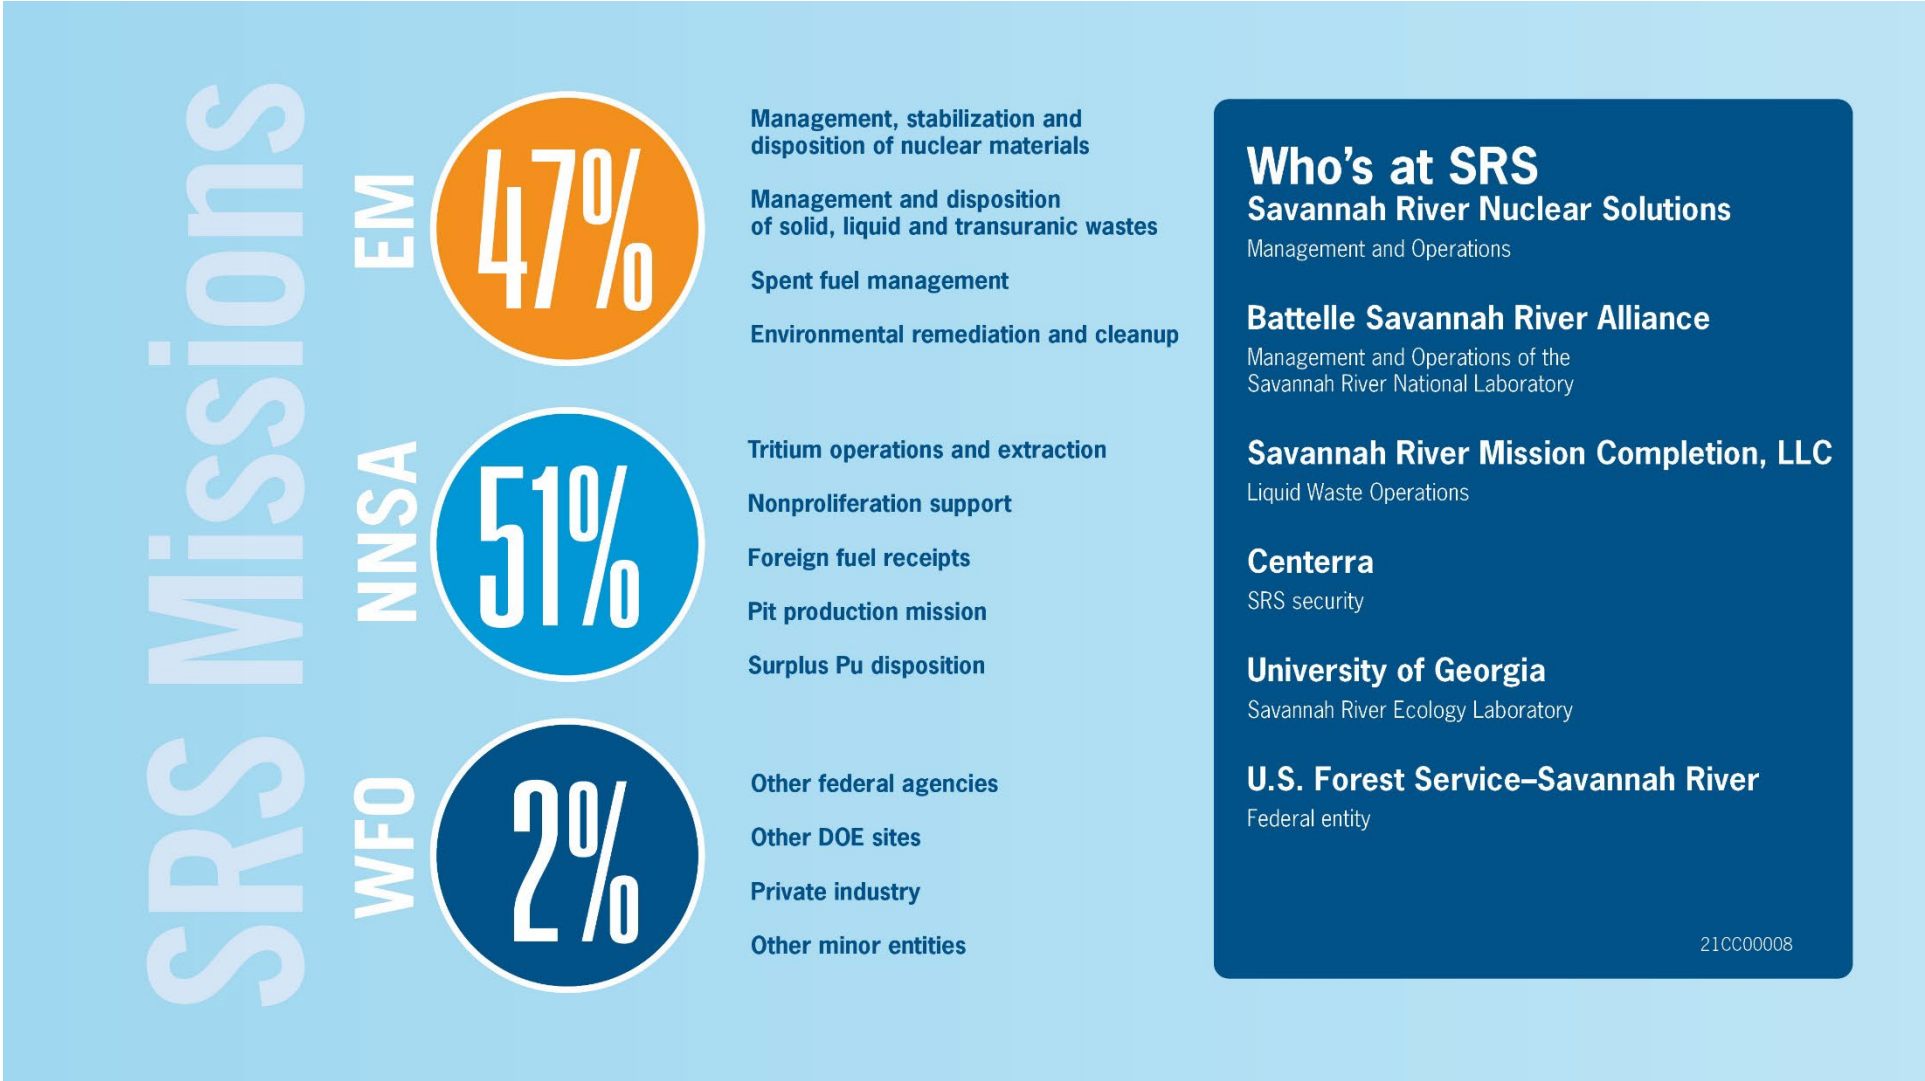

SRS specific job fair held to fill Site vacancies to minimize directed reassignments

## COMMS PLAN

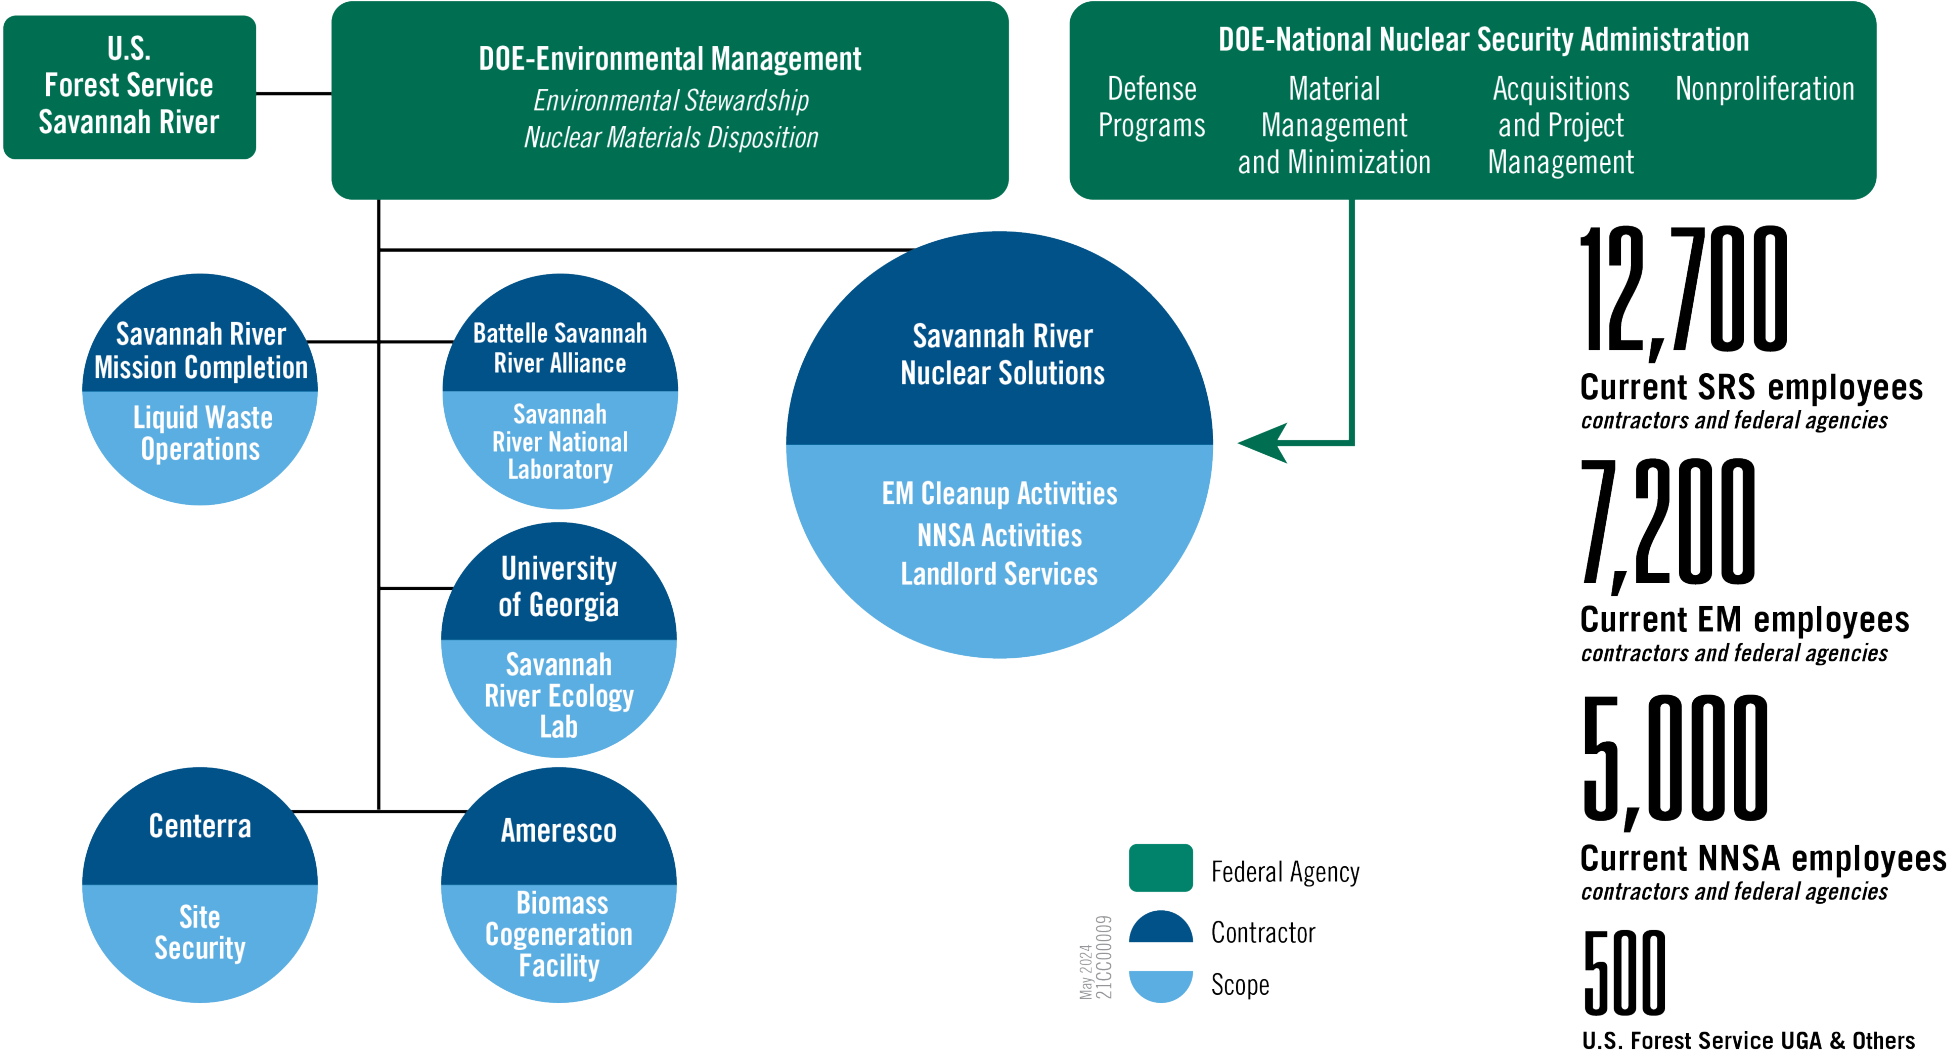

Developed communication plan to roll out staffing plans

# Post-Transition Responsibility

Black – do not change

Blue – move from EM to NNSA

## EM Facilities

- Savannah River National Lab (SRNL)
- H-Canyon (within H-Area)
- L-Area
- H & F Tank Farms, J, S, Z-areas (liquid waste facilities)
- Former reactors C, P, R
- D-Area (undergoing D&D)
- E-Area (solid waste)
- F-Area

## NNSA Facilities

- Tritium (within H-Area)
- SRPPF
- General Site (roads, water, electricity, sewer, etc.)
- Barricades
- A-Area (outside SRNL)
- B-Area
- K-Area
- N-Area (medical and shops)
- ATTA range
- Centerra Facilities

## Contracts

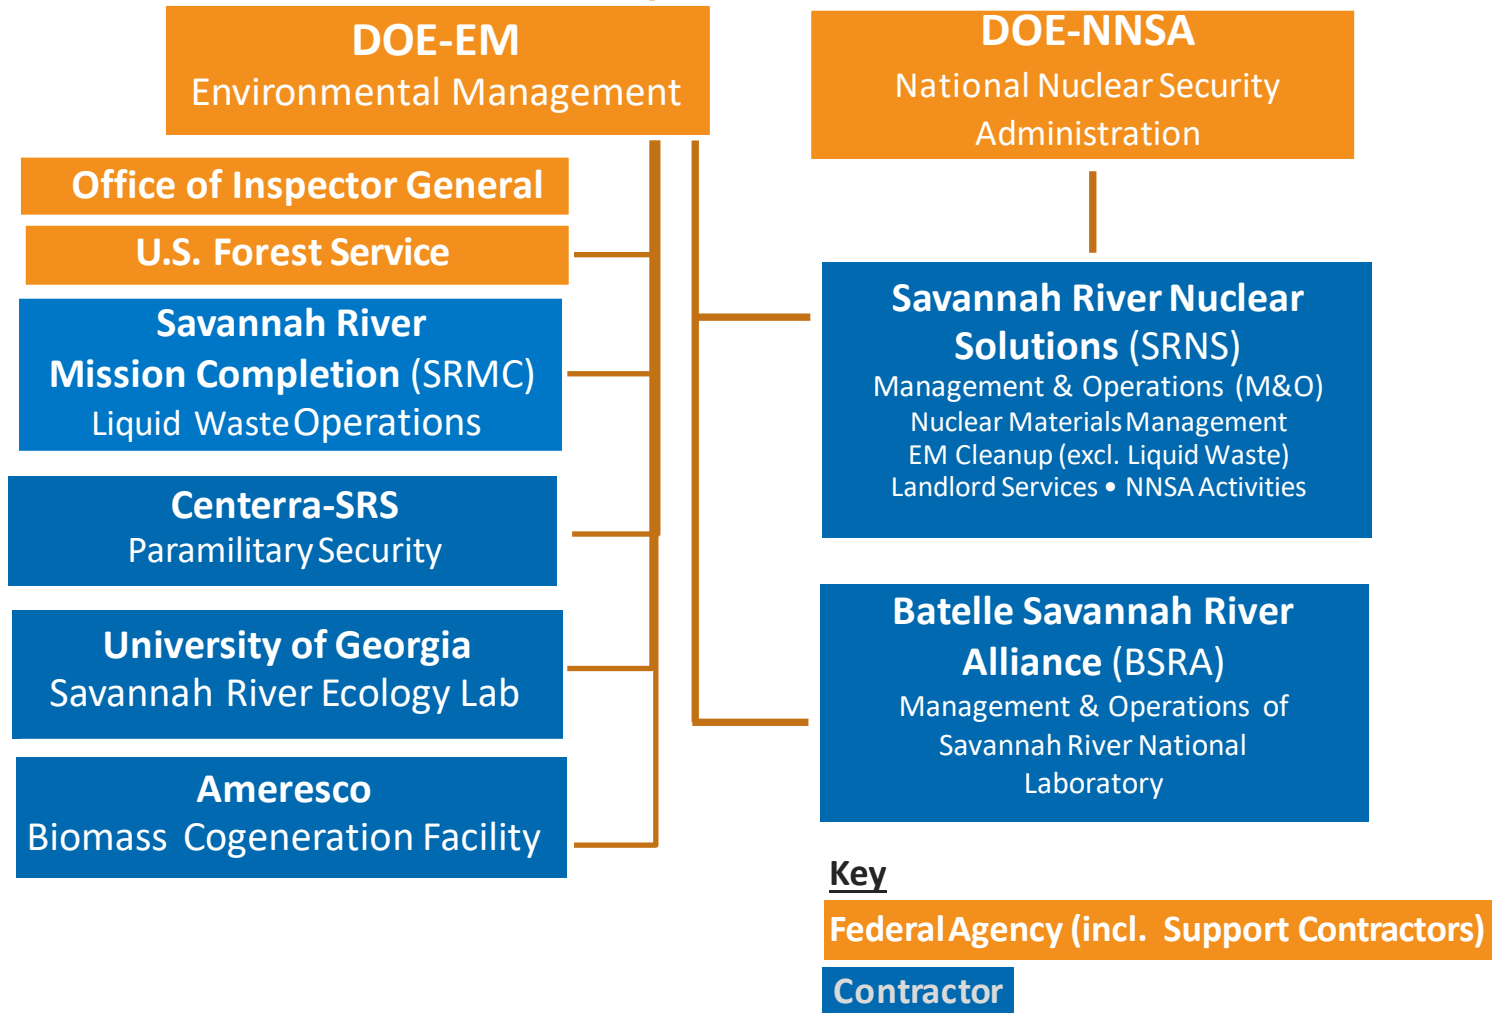

- Site M&O
- Ameresco
- SC Dominion Energy
- Pro-Force Security

## OTHER

- SRNS S&S Support
- Clearances
- USDA Forest Service
- FERC
- SR Ecology Lab (UGA)
- SC Institute of Archeology & Anthropology
- CSX Transportation
- Historical Preservation
- GA and SC Emergency Management
- Payment in Lieu of Taxes
- 85 Federal FTEs
