

United States Government

Department of Energy (DOE)

Savannah River Operations Office (SR)

# memorandum

DATE: AUG 01 1997

REPLY TO:

ATTN OF: SWD (V. Sauls, (803) 725-4505)

SUBJECT: Savannah River Site (SRS) Citizens Advisory Board (CAB) Recommendation on Complex-Wide Environmental Management (EM) Integration

TO: Alvin L. Alm, Assistant Secretary for Environmental Management (EM-1), HQ

During their recent discussions and review of *Accelerating Cleanup: Focus on 2006*, the SRS CAB also reviewed the recommendations made by the Complex-Wide EM Integration Team (*A Contractor Report to the Department of Energy on Environmental Management Baseline Programs and Integration Opportunities*). At the Board's meeting on July 22, 1997, a recommendation was passed pertaining to the need for a national dialogue among stakeholders on the recommendations outlined in the Report. The SRS CAB asked that Savannah River Operations Office forward the recommendation to Headquarters for necessary action. Attached is the recommendation for your use in planning future stakeholder involvement for EM Integration activities. Please respond to the SRS CAB regarding this recommendation.

SR endorses the recommendation made by the SRS CAB and also recommends that a workshop specifically on EM Integration opportunities be held as part of the national stakeholders meeting on *Accelerating Cleanup: Focus on 2006*. This will allow a forum for stakeholders across the complex to discuss their views relative to the recommendations for complex-wide improvements.

If you have any additional questions, you may contact me or Virgil Sauls at the above referenced number.
